

## TAKING YOU TO THE NEXT LEVEL

Elevated Technologies, LLC (Elevated), a service-disabled veteran-owned small business (SDVOSB), provides a comprehensive suite of solutions for commercial and government information technology, aviation maintenance and intelligence, surveillance, and reconnaissance (ISR) customers.

## AT ELEVATED WE ARE COMMITTED TO...

- ✓ Providing the most cost effective, efficient, and technically accurate services in the industry.
- ✓ Supporting programs regardless of the challenge, location, or complexity.
- ✓ Maintaining a team of qualified subject matter experts, who are available to develop and manage your program.
- ✓ Fostering close relationships with veteran service organizations, which enables us to recruit the highest quality veterans transitioning from military service.
- ✓ Creating ease of invoicing and time accountability, by utilizing Deltek as our system of record.

### Training

- Product & Curriculum Development
- Program Execution
- Training Formats
  - Classroom-Based, E-Learning, or On-the-Job Training

### Information Technology

- System Integration
- Network Engineering
- Cybersecurity
- Infrastructure

### Technical Documentation

- Technical Writing
- Technical Illustrations

### PTC Arbortext Support

- In-Person and Web-Based Training
- Software IT Support

### Field Service Representatives

- Provide Support
  - On-Site, Remote, or Hybrid
- Complete Repairs
- Train Personnel

### Aviation Maintenance

- Training
- Management
- Quality Assurance & Control

# INFORMATION TECHNOLOGY

Elevated's team includes a robust crew of credentialed information technology professionals, enabling our team to support commercial and government customers with Cybersecurity, System Integration, Infrastructure, Test & Evaluation, and Network Engineering solutions.

## CORE CAPABILITIES

### SYSTEM INTEGRATION

- Elevated specializes in the integration of intelligence, surveillance, and reconnaissance (ISR) assets into new or existing network infrastructure adding real-time data flow to critical components.
- Integrating ISR hardware, software, and networking technologies we create a single operational picture and provide end users with secure remote access to operations data, regardless of geographic location.

### INFRASTRUCTURE

- Our engineers are experienced in design and review of IT infrastructure solutions to fulfill client requirements.
- The team can identify and resolve obsolescence and modernization challenges for existing IT infrastructure to meet technology and environmental conditions.
  - COTs software, virtualization technologies, servers, storage appliances, and various networks equipment.

### CYBERSECURITY

- Elevated provides vulnerability analysis, remediation, containment, eradication, recovery, and incident reporting services.
- Team members are deployable OCONUS to evaluate and resolve sensitive cybersecurity related issues.
- Our team provides training services on enhanced end-user defense security encompassing strategies; that include integrating people, operations, and technology.

### NETWORK ENGINEERING

- Elevated specializes in secure video and data dissemination, utilizing virtual private network (VPN) tunnels over commercial networks, with commercial or military-grade encryption. This maintains data authenticity, integrity, and confidentiality.
- Our engineers provide design, planning, installation, configuration, management, and troubleshooting solutions for secure networks.
